

Inventory Management Platform with Integrated WMS

TRADEPEGE

Suitable for Wholesale and Multichannel Ecommerce Companies

# Who We Are

- ▶ Formed in 2015
- ▶ Built from the ground up working with customers
- ▶ Fastest growing Inventory Management Platform for SMEs
- ▶ Fully developed in-house

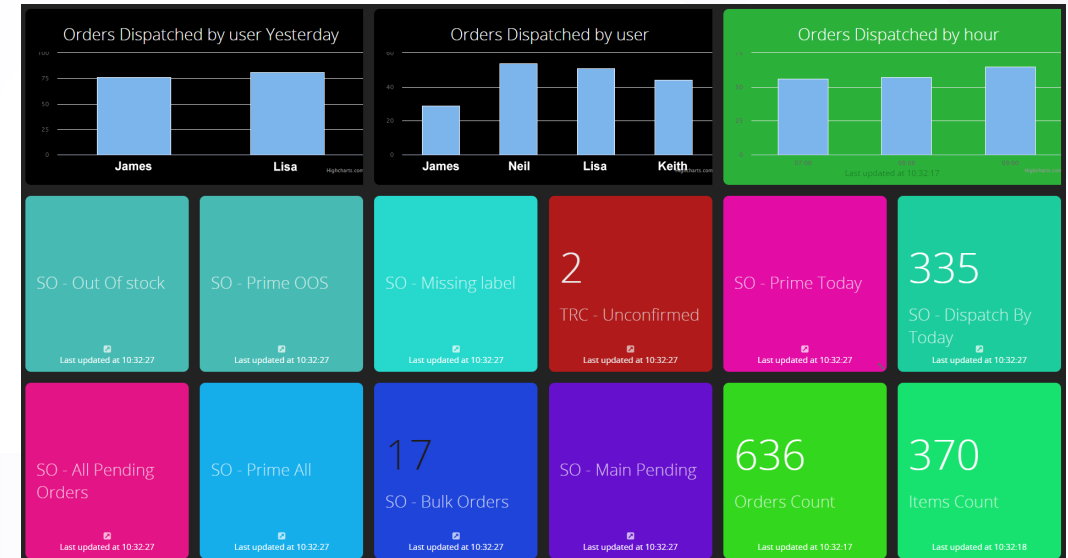

# Innovative Solution Seekers

Our aim is simple. To maximise your business efficiency, increase profitability whilst saving you time that can be spent moving your business forward.

We consolidate all elements of your day-to-day activities from order and warehouse management to reporting and invoicing with the the industry's most user-friendly visibility combined with bulletproof accuracy. This enables you to eliminate errors and take full control of your business.

Our renowned KPI custom dashboards allow you to see live snapshots of all the important data that means most to you. Keep an eye on your business at all times, wherever you are.

Tailored KPI Dashboards

# Unmatched Onboarding & Support

Change can be daunting. We provide personal hand-holding consultancy throughout your onboarding process to guarantee the platform is set-up to match your business needs as well as smoothing the transition onto your new platform.

We are also unique in that we are able to tailor the software to meet your specific requirements and we also have a Feature Submission area allowing our clients to influence the continual evolution of our software.

We integrate with new marketplaces as they come up allowing you to enjoy extra reach for your products and services.

On the right, you can see Andreas, one of our team, with some of Au Vodka's warehouse staff during an onboarding day.
